

Tactical Decision Platform for Heterogeneous Unmanned Teams

Don't Replace Your Fleet. Upgrade How It Coordinates.

01

BABYLON Market

Build Bay · Modular fleet assembly

02

ALAYA Wargame

Mission simulation

03

Partner Execution

Partner integration

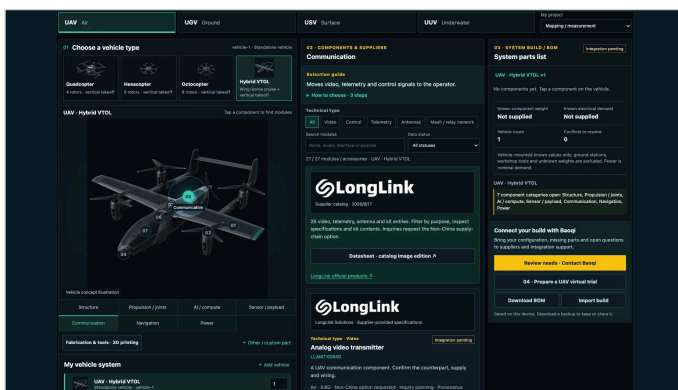

Configure the team. Validate the mission. Connect partner systems.

01 / Configure from existing capabilities

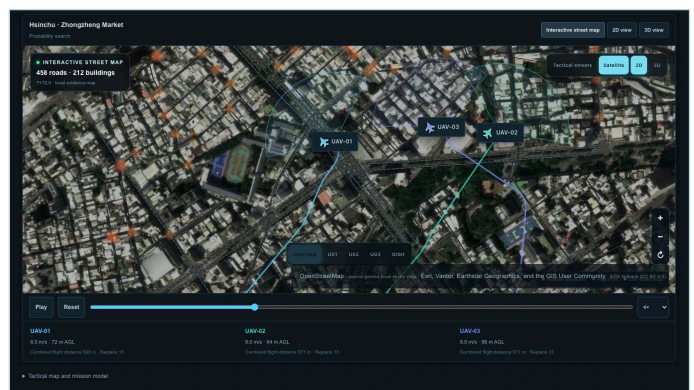

BABYLON Market brings vehicles, components and suppliers into one mission configuration workflow. Build Bay organizes airframes, payloads, propulsion, communications, sensing and energy into a fleet configuration and bill of materials.

02 / Evaluate the team in ALAYA

ALAYA Wargame evaluates role allocation, coordinated action and changing conditions in mission scenarios. Its ZERO tactical generation engine develops candidate courses of action. Mission plans connect with existing C2, ground stations and partner execution systems.

Actual system: BABYLON Build Bay

Actual system: ALAYA urban search simulation

WORKING TOGETHER

Bring your mission objectives, existing vehicles and integration interfaces. Together, define the fleet configuration, simulation scenarios and partner integration steps.
